Semester: VIII

Bachelor of Computer Engineering (BE Computer)

Supervisor:

……..

Purbanchal University School of Engineering

Department of Computer Engineering

Year: 2083

Submitted Date: 2083/03/23 **Supervisor Signature: ……..**

DECLARATION OF ORIGINALITYf

We, the undersigned student of the Purbanchal University School of Engineering (PUSOE), hereby declare that the project entitled **“DevDoko: A Social Networking Platform for Developers”** is an original and authentic work carried out by us as part of the academic requirements for the Bachelor level program.

This project represents our own effort in analysis, system design, development, and documentation. The entire process has been completed with sincerity, dedication, and academic integrity. All references, resources, and ideas taken from external sources have been properly acknowledged and cited wherever necessary.

The DevDoko platform has been developed with the objective of creating a professional social networking environment specifically for developers. The system focuses on enabling collaboration, knowledge sharing, project showcasing, and professional networking among programmers and technology enthusiasts. Through this project, we have applied the theoretical concepts and practical skills learned throughout the course, integrating them into a real-world software solution.

We would like to express my sincere gratitude to the faculty members, supervisor, and department for their valuable guidance, encouragement, and support throughout the development of this project.

Student Name	REGISTRATION NO.
Narayan Shrestha	159-7-2-07626-2021
Priyanka Karki	159-7-2-07640-2021
Simran Baral	159-7-2-07650-2021
Prekshya Rai	159-7-2-07638-2021

ACKNOWLEDGEMENT

We would like to express our sincere gratitude to Mr. Dharmendra Kr. Singh, Head of Department, for his continuous encouragement, guidance, and support throughout the development of this project. His motivation and constructive suggestions have been invaluable in helping us move forward with confidence and clarity during each phase of the work. We are deeply thankful to our project supervisor, Er. Santosh Sah, for his dedicated guidance, technical advice, and valuable feedback during the entire project period. His expertise, patience, and willingness to help have played a crucial role in shaping this project and overcoming the challenges encountered along the way.

We would also like to extend our heartfelt appreciation to Purbanchal University School of Engineering (PUSOE) for providing a supportive academic environment, necessary resources, and the opportunity to undertake this project as part of our academic curriculum. The knowledge, infrastructure, and learning platform provided by the institution have greatly contributed to the successful completion of this work. Our sincere thanks also go to all the respected faculty members and staff of PUSOE for their support, encouragement, and guidance during presentations and evaluations. Their feedback has helped us refine both our technical and presentation skills.

Finally, we would like to thank our friends, colleagues, and well-wishers who directly or indirectly supported us throughout this project. Their encouragement, suggestions, and moral support have been truly motivating and helped us remain focused until completion.

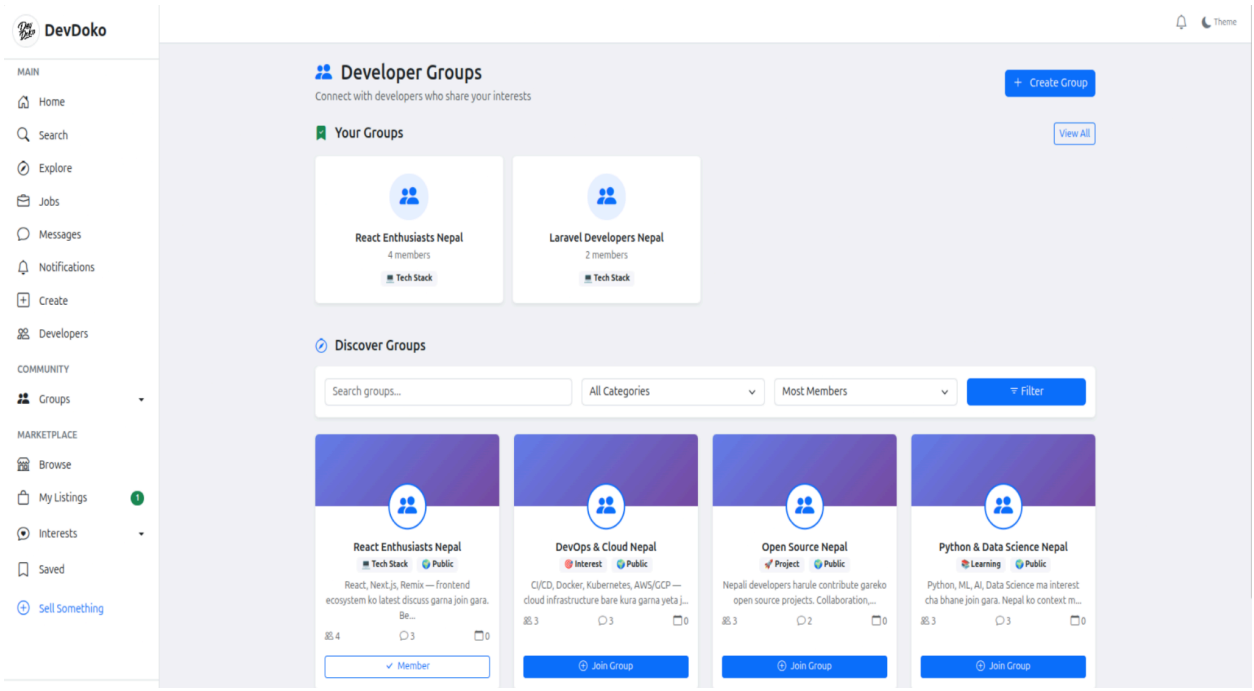

Students:
